#395 Herring Aide

The recommended length of leader for Chinook when using spoons is 42" from the end of the flasher to the ring on the top of the spoon. Use either Pline 30lb Fluorocarbon leader material or Maxima 30lb Ultra Green leader material when tying the spoons to the flasher. Tie a Sampo X3RB ball bearing snap swivel to the fishing line and snap the swivel to the narrow end of the flasher. The spoons attach to the wider end of the flasher.

Uses these scents on the flasher and the spoon:

Smelly Jelly Sticky Liquid Herring

Mikes Lunker Lotion Extra Strength Herring
